Philanthropy Matters.
Lafayette’s position of leadership in undergraduate education has benefited from the extraordinary generosity, devotion, and commitment of the College’s alumni, parents, and friends over many generations.

Whether your interests lie in technology or athletics, pioneering research or the arts, campus life or financial aid, or countless other programs at the College, you can continue this remarkable tradition of personal support and help Lafayette achieve an even greater reputation for educational excellence.

With your gift today, Lafayette can make investments in...

A Data-Driven Student Success Center
The center will house biology, computer science, and related programs. Essential to recruiting the best students and faculty, the center will support teaching, research, and technology and will host GLFRA, a program that connects incoming engineering and the liberal arts with rice rotational problems.

Academic Facilities
Lafayette plans calls for cutting-edge labs, smart classrooms, and public spaces that unite engagement between students and faculty members and foster flexibility as teaching styles and methods evolve.

Williams Arts Campus
Comprising the 750,000-square-foot Arts Campus, the center will accommodate growth in music theater and fine and media studies classes. Facilities include a media and art studio, lifeline refectory room, a black box theater, making Lafayette a vibrant center for artistic expression.

Science and Engineering
Engineering and the sciences are cornerstones of Lafayette’s curriculum. To ensure exceptional learning experiences, we need support for faculty development, new programs, equipment, and other essential resources for teaching and research.

Faculty
Lafayette’s greatest asset is its faculty. By endowing professorships and continuing to add faculty positions, we will honor and attract the finest faculty members to stabilize core courses, enhance interdisciplinary course offerings, and increase flexibility within our curricula.

Student Research and Internships
Expanding access to opportunities such as the USRA Program will provide more students with high-level research experiences. Additional funds for internship stipends increase the number of students who can explore career options in fields that interest them.

Technology and Innovation
Creative applications of technology will broaden and enrich the work of faculty, lecturers, and others, underscoring the College’s commitment to leading changes in the use of technology to advance its educational mission.

Financial Aid
Attracting the best students is critical. Additional resources for need-based aid and merit scholarships will make a Lafayette education more accessible to qualified students, regardless of income.

Athletics
To recruit, develop, and retain the best students and improve our athletic programs, we must maintain the state-of-the-art equipment and facilities, expand the educational and career-enhancement opportunities available to student-athletes.

Connected Communities Program
To heighten the sense of campus connectivity, Lafayette will launch a residential life program that creates communities around shared interests and values. Other initiatives will incorporate academic advising, career counseling, intramural competitions, and social activities.

Annual Fund
The Lafayette Annual Fund will remain an essential source of ongoing operating support, providing flexible funding that helps us meet pressing needs and take advantage of unexpected opportunities.

Emerging Initiatives
These funds will enable us to respond to new opportunities as they arise and allow us to incorporate gifts from alumni and friends whose interests fall outside of designated campaign priorities.
